Support

This integration is designated as **ThreatQ Supported**.

Support Email: support@threatq.com

Support Web: <https://support.threatq.com>

Support Phone: 703.574.9893

Integrations/apps/add-ons designated as **ThreatQ Supported** are fully supported by ThreatQuotient's Customer Support team.

ThreatQuotient strives to ensure all ThreatQ Supported integrations will work with the current version of ThreatQuotient software at the time of initial publishing. This applies for both Hosted instance and Non-Hosted instance customers.

ThreatQuotient does not provide support or maintenance for integrations, apps, or add-ons published by any party other than ThreatQuotient, including third-party developers.

Export Details

ThreatQuotient provides the following details for this export:

Current Guide Version	1.0.0
-----------------------	-------

Support Tier	ThreatQ Supported
--------------	-------------------

Introduction

This guide explains how to export Tenable indicators for use with an external threat detection system. The steps provided are for exporting the following Tenable indicator types:

- Tenable FQDN
- Tenable IP Address
- Tenable MD5 Address

Creating the Export

The following section will detail how to create the exports in ThreatQ.

See the Managing Exports topic for more details on ThreatQ exports.

1. Select the **Settings icon > Exports**.

The Exports page appears with a table listing all exports in alphabetical order.

2. Click **Add New Export**

The Connection Settings dialog box appears.

3. Enter an **Export Name**.

4. Click **Next Step**.

The Output Format dialog box appears.

5. Provide the following information based on the type of indicator:

Tenable FQDNs

FIELD	VALUE
Type of information you would like to export?	Indicators
Output type	text/plain
Special Parameters	indicator.status=Active&indicator.deleted=N&indicator.type=FQDN&indicator.class=network
Output Template	<pre><> {foreach \$data as \$indicator} {\$indicator.value},{foreach \$indicator.Sources item=source name=Sources} {\$source.value}{if \$smarty.foreach.Sources.last == false}/{/if}/{/foreach} {/foreach}</pre>

Tenable IP Address

FIELD	VALUE
Type of information you would like to export?	Indicators
Output type	text/plain
Special Parameters	<code>indicator.status=Active&indicator.deleted=N&indicator.type=IP</code> <code>Address&indicator.class=network</code>
Output Template	<pre><> {foreach \$data as \$indicator} {\$indicator.value},{foreach \$indicator.Sources item=source name=Sources} {\$source.value}{if \$smarty.foreach.Sources.last == false}/{/if}/{/foreach} {/foreach}</pre>

Tenable MD5 Address

FIELD	VALUE
Type of information you would like to export?	Indicators
Output type	text/plain
Special Parameters	<code>indicator.status=Active&indicator.deleted=N&indicator.type=MD5&indicator.class=network</code>
Output Template	<pre><> {foreach \$data as \$indicator} {\$indicator.value},{foreach \$indicator.Sources item=source name=Sources} {\$source.value}{if \$smarty.foreach.Sources.last == false}/{/if}/{/foreach} {/foreach}</pre> <div> This will strip the port and URL path from the IOCs.</div>

6. Click on **Save Settings** and enable the export via the On/Off toggle switch.
