Support

This integration is designated as **ThreatQ Supported**.

Support Email: support@threatq.com

Support Web: <https://support.threatq.com>

Support Phone: 703.574.9893

Integrations/apps/add-ons designated as **ThreatQ Supported** are fully supported by ThreatQuotient's Customer Support team.

ThreatQuotient strives to ensure all ThreatQ Supported integrations will work with the current version of ThreatQuotient software at the time of initial publishing. This applies for both Hosted instance and Non-Hosted instance customers.

ThreatQuotient does not provide support or maintenance for integrations, apps, or add-ons published by any party other than ThreatQuotient, including third-party developers.

Integration Details

ThreatQuotient provides the following details for this integration:

Current Integration Version 1.0.1

**Compatible with ThreatQ
Versions** $\geq 6.5.0$

Support Tier ThreatQ Supported

Introduction

The BleepingComputer CDF enables analysts to stay on top of the latest security news and research from BleepingComputer. This feed periodically pulls research posts from BleepingComputer and ingests them into ThreatQ as Report objects.

The integration provides the following feed:

- **BleepingComputer Security News** - periodically pulls news posts from BleepingComputer's security category and ingests them into ThreatQ as Report objects.

The integration ingests Reports and Report attributes.

Installation

Perform the following steps to install the integration:

The same steps can be used to upgrade the integration to a new version.

1. Log into <https://marketplace.threatq.com/>.
2. Locate and download the integration yaml file.
3. Navigate to the integrations management page on your ThreatQ instance.
4. Click on the **Add New Integration** button.
5. Upload the integration yaml file using one of the following methods:
 - Drag and drop the file into the dialog box
 - Select **Click to Browse** to locate the file on your local machine

ThreatQ will inform you if the feed already exists on the platform and will require user confirmation before proceeding. ThreatQ will also inform you if the new version of the feed contains changes to the user configuration. The new user configurations will overwrite the existing ones for the feed and will require user confirmation before proceeding.

The feed will be added to the integrations page. You will still need to [configure and then enable](#) the feed.

Configuration

ThreatQuotient does not issue API keys for third-party vendors. Contact the specific vendor to obtain API keys and other integration-related credentials.

To configure the integration:

1. Navigate to your integrations management page in ThreatQ.
2. Select the **OSINT** option from the *Category* dropdown (optional).

If you are installing the integration for the first time, it will be located under the **Disabled** tab.

3. Click on the integration entry to open its details page.
4. Enter the following parameters under the **Configuration** tab:

PARAMETER	DESCRIPTION
Enable SSL Certificate Verification	Enable this parameter if the feed should validate the host-provided SSL certificate.
Disable Proxies	Enable this parameter if the feed should not honor proxies set in the ThreatQ UI.

< BleepingComputer Security News

Disabled ☐ Enabled

Run Integration

Uninstall

Additional Information

Integration Type: Feed

Version:

Configuration Activity Log

Overview

This feed pulls the posts from BleepingComputer's Security News feed. The full content of the posts will be parsed and ingested into ThreatQ as report objects. Just note, this feed will only pull the recent posts (latest 3 pages) from the blog.

☒ Enable SSL Certificate Verification

☒ Disable Proxies

If true, specifies that this feed should not honor any proxies setup in ThreatQuotient

Set indicator status to...

Review

Run Frequency

Every 24 Hours

Next scheduled run:
02/19/2025 06:07am

☒ Send a notification when this feed encounters issues.

☒ Debug Option: Save the raw data response files.

We recommend leaving this disabled unless actively troubleshooting an issue because it utilizes a lot of disk space.

Save

5. Review any additional settings, make any changes if needed, and click on **Save**.
6. Click on the toggle switch, located above the *Additional Information* section, to enable it.

ThreatQ Mapping

BleepingComputer Security News

The BleepingComputer Security News feed periodically pulls news posts from BleepingComputer's security category and ingests them into ThreatQ as Report objects.

GET <https://www.bleepingcomputer.com/tag/security/>

This request returns HTML. The HTML is parsed for the title, date, links, etc. The blog itself is then fetched.

GET <https://www.bleepingcomputer.com/{{ uri }}>

The mapping for this feed is based on the information parsed out of the blog's HTML content.

ThreatQuotient provides the following default mapping for this feed:

FEED DATA PATH	THREATQ ENTITY	THREATQ OBJECT TYPE OR ATTRIBUTE KEY	PUBLISHED DATE	EXAMPLES	NOTES
N/A	Report.Title	N/A	N/A	LUCR-3: Scattered Spider Getting SaaS-y in the Cloud	Parsed from the HTML
N/A	Report.Description	N/A	N/A	N/A	Parsed from the HTML
N/A	Report.Attribute	External Reference	N/A	https://www.bleepingcomputer.com/news/security/blacksuit-ransomware-stole-data-of-950-000-from-software-vendor/	Parsed from HTML
N/A	Report.Attribute	Published At	N/A	September 05, 2024	Parsed from the HTML, Updatable
N/A	Report.Attribute	Author	N/A	Bill Toulas	Parsed from the HTML

Average Feed Run

Object counts and Feed runtime are supplied as generalities only - objects returned by a provider can differ based on credential configurations and Feed runtime may vary based on system resources and load.

METRIC	RESULT
Run Time	1 minute
Reports	14
Report Attributes	26

Known Issues / Limitations

- The feed utilizes **since** and **until** dates to make sure entries are not re-ingested if they haven't been updated.
- If you need to ingest historical blog posts, run the feed manually by setting the **since** date back.
- The feed will only pull at maximum, the first two pages of news posts from BleepingComputer.

Change Log

- **Version 1.0.1**
 - Resolved an issue where an error would occur when an author could not be found/parsed.
- **Version 1.0.0**
 - Initial release
