# Support

This integration is designated as **ThreatQ Supported**.

**Support Email:** [support@threatq.com](mailto:support@threatq.com)

**Support Web:** <https://support.threatq.com>

**Support Phone:** 703.574.9893

Integrations/apps/add-ons designated as **ThreatQ Supported** are fully supported by ThreatQuotient's Customer Support team.

ThreatQuotient strives to ensure all ThreatQ Supported integrations will work with the current version of ThreatQuotient software at the time of initial publishing. This applies for both Hosted instance and Non-Hosted instance customers.

ThreatQuotient does not provide support or maintenance for integrations, apps, or add-ons published by any party other than ThreatQuotient, including third-party developers.

# Integration Details

ThreatQuotient provides the following details for this integration:

Current Integration Version	1.1.0
Compatible with ThreatQ Versions	>= 5.0.0
Support Tier	ThreatQ Supported

# Introduction

The CI Army List IPs CDF for ThreatQ retrieves a list of the top 15,000 malicious IP addresses.

The integration provides the following endpoint:

- **CI Army List IPs** - retrieves a list of malicious IP addresses and ingests them as indicators into ThreatQ.

The integration ingests IP Address type indicators into the ThreatQ platform.

# Installation

Perform the following steps to install the integration:

The same steps can be used to upgrade the integration to a new version.

1. Log into <https://marketplace.threatq.com/>.
2. Locate and download the integration file.
3. Navigate to the integrations management page on your ThreatQ instance.
4. Click on the **Add New Integration** button.
5. Upload the integration file using one of the following methods:
  - Drag and drop the file into the dialog box
  - Select **Click to Browse** to locate the integration file on your local machine

ThreatQ will inform you if the feed already exists on the platform and will require user confirmation before proceeding. ThreatQ will also inform you if the new version of the feed contains changes to the user configuration. The new user configurations will overwrite the existing ones for the feed and will require user confirmation before proceeding.

6. If prompted, select the individual feeds to install and click **Install**. The feed will be added to the integrations page.

You will still need to [configure and then enable](#) the feed.

# Configuration

ThreatQuotient does not issue API keys for third-party vendors. Contact the specific vendor to obtain API keys and other integration-related credentials.

To configure the integration:

1. Navigate to your integrations management page in ThreatQ.
2. Select the **OSINT** option from the *Category* dropdown (optional).

If you are installing the integration for the first time, it will be located under the **Disabled** tab.

3. Click on the integration entry to open its details page.
4. Enter the following parameters under the **Configuration** tab:

PARAMETER	DESCRIPTION
<b>Enable SSL Certificate Verification</b>	Enable this parameter if the feed should validate the host-provided SSL certificate.
<b>Disable Proxies</b>	Enable this parameter if the feed should not honor proxies set in the ThreatQ UI.

5. Review any additional settings, make any changes if needed, and click on **Save**.
6. Click on the toggle switch, located above the *Additional Information* section, to enable it.

# ThreatQ Mapping

## CI Army List IPs

The CI Army List IPs feed retrieves a list of malicious IP addresses and ingests them as indicators into ThreatQ.

GET <https://cinsscore.com/list/ci-badguys.txt>

### Sample Response:

```
1.116.107.130
1.116.123.100
1.116.140.153
1.116.152.38
1.116.157.87
1.116.161.241
1.116.16.205
1.116.175.214
1.116.176.122
1.116.179.58
```

ThreatQuotient provides the following default mapping for this feed:

FEED DATA PATH	THREATQ ENTITY	THREATQ OBJECT TYPE OR ATTRIBUTE KEY	EXAMPLES	NOTES
1 (first token)	Indicator.Value	IP Address	223.95.205.217	N/A

# Average Feed Run

Object counts and Feed runtime are supplied as generalities only - objects returned by a provider can differ based on credential configurations and Feed runtime may vary based on system resources and load.

## CI Army List IPs

METRIC	RESULT
Run Time	3 minutes
Indicators	15,000

---

# Change Log

- **Version 1.1.0**
  - 
  - Updated the URL for the feed endpoint.
  - Added the following new configuration parameters:
    - **Enable SSL Certificate Verification** - enable this parameter if the feed should validate the host-provided SSL certificate.
    - **Disable Proxies** - enable this parameter if the feed should not honor proxies set in the ThreatQ UI.
  - Updated the minimum ThreatQ version to 5.0.0.
- **Version 1.0.0**
  - Initial release
