Support

This integration is designated as ThreatQ Supported.

Support Email: support@threatq.com Support Web: https://support.threatq.com

Support Phone: 703.574.9893

Integrations/apps/add-ons designated as ThreatQ Supported are fully supported by ThreatQuotient's Customer Support team.

ThreatQuotient strives to ensure all ThreatQ Supported integrations will work with the current version of ThreatQuotient software at the time of initial publishing. This applies for both Hosted instance and Non-Hosted instance customers.

🛕 ThreatQuotient does not provide support or maintenance for integrations, apps, or add-ons published by any party other than ThreatQuotient, including third-party developers.

Integration Details

ThreatQuotient provides the following details for this integration:

Current Integration

marketplace.threatq.com/ details/cisco-umbrellaenforcement-operation

Introduction

The Cisco Umbrella Enforcement operation for ThreatQ allows users to submit indicators to Cisco Umbrella Enforcement to be either added or removed from blocklist.

The integration provides the following actions:

- Add to Block List adds the submitted indicator to the Cisco Umbrella Enforcement block list.
- Remove from Block List removes the submitted indicator from the Cisco Umbrella Enforcement block list.

The integration is compatible with FQDN and URL type indicators.

Prerequisites

The operation requires the following:

• Active Cisco Umbrella Enforcement API credentials.

Installation

Perform the following steps to install the integration:

The same steps can be used to upgrade the integration to a new version.

- 1. Log into https://marketplace.threatq.com/.
- 2. Locate and download the integration file.
- 3. Navigate to the integrations management page on your ThreatQ instance.
- 4. Click on the **Add New Integration** button.
- 5. Upload the integration file using one of the following methods:
 - Drag and drop the file into the dialog box
 - Select Click to Browse to locate the integration file on your local machine

ThreatQ will inform you if the operation already exists on the platform and will require user confirmation before proceeding. ThreatQ will also inform you if the new version of the operation contains changes to the user configuration. The new user configurations will overwrite the existing ones for the operation and will require user confirmation before proceeding.

The operation is now installed and will be displayed in the ThreatQ UI. You will still need to configure and then enable the operation.

Configuration

ThreatQuotient does not issue API keys for third-party vendors. Contact the specific vendor to obtain API keys and other integration-related credentials.

To configure the integration:

- 1. Navigate to your integrations management page in ThreatQ.
- 2. Select the **Operation** option from the *Type* dropdown (optional).
- 3. Click on the integration entry to open its details page.
- 4. Enter the following parameter under the **Configuration** tab:

PARAMETER

DESCRIPTION

API Key

Your access token for authenticating with Cisco Umbrella

Enforcement API.

- 5. Review any additional settings, make any changes if needed, and click on Save.
- 6. Click on the toggle switch, located above the Additional Information section, to enable it.

Actions

The operation provides the following actions:

ACTION	DESCRIPTION	OBJECT TYPE	OBJECT SUBTYPE
Add to Block List	This action adds the submitted indicator to the Cisco Umbrella Enforcement block list	Indicator	FQDN, URL
Remove from Block List	This action removes the submitted indicator from the Cisco Umbrella Enforcement block list	Indicator	FQDN, URL
