Support

This integration is designated as **ThreatQ Supported**.

Support Email: tq-support@securonix.com
Support Web: https://ts.securonix.com
Support Phone: 703.574.9893

Integrations/apps/add-ons designated as **ThreatQ Supported** are fully supported by ThreatQuotient's Customer Support team.

ThreatQuotient strives to ensure all ThreatQ Supported integrations will work with the current version of ThreatQuotient software at the time of initial publishing. This applies for both Hosted instance and Non-Hosted instance customers.

> ThreatQuotient does not provide support or maintenance for integrations, apps, or add-ons published by any party other than ThreatQuotient, including third-party developers.

Integration Details

ThreatQuotient provides the following details for this integration:

Current Integration Version	1.0.0
Compatible with ThreatQ Versions	>= 5.5.0
Support Tier	ThreatQ Supported

Introduction

The Cyfirma Cyber Research CDF enables analysts to automatically ingest content from the Cyfirma Cyber Research blog: `https://www.cyfirma.com/cyber-research`. This ensures analysts remain current on published news, vulnerabilities, and other threat research articles.

The integration provides the following feed:

- **Cyfirma Cyber Research Blog** - ingests blog posts as reports filtered by published time.

The integration ingests Report object types.

Installation

Perform the following steps to install the integration:

1. Log into https://marketplace.threatq.com/.
2. Locate and download the integration yaml file.
3. Navigate to the integrations management page on your ThreatQ instance.
4. Click on the **Add New Integration** button.
5. Upload the integration yaml file using one of the following methods:
    - Drag and drop the file into the dialog box
    - Select **Click to Browse** to locate the file on your local machine

> ThreatQ will inform you if the feed already exists on the platform and will require user confirmation before proceeding. ThreatQ will also inform you if the new version of the feed contains changes to the user configuration. The new user configurations will overwrite the existing ones for the feed and will require user confirmation before proceeding.

The feed will be added to the integrations page. You will still need to configure and then enable the feed.

Configuration

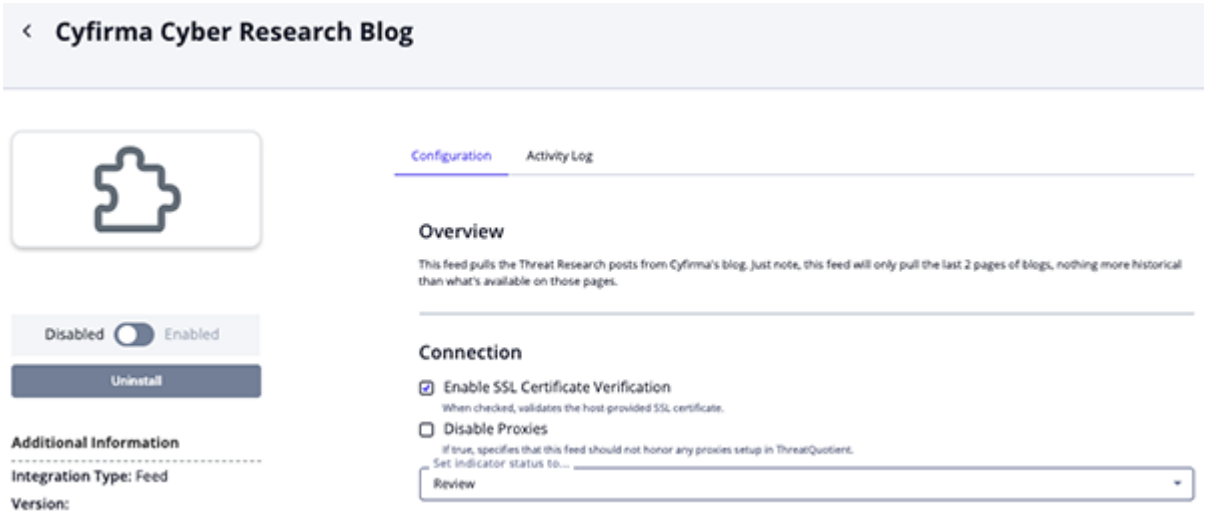
To configure the integration:

1. Navigate to your integrations management page in ThreatQ.
2. Select the **OSINT** category from the *Category* dropdown (optional).

   > If you are installing the integration for the first time, it will be located under the **Disabled** tab.

3. Click on the integration entry to open its details page.
4. Review the following parameters under the **Configuration** tab:

PARAMETER	DESCRIPTION
Enable SSL Certificate Verification	Enable this parameter if the feed should validate the host-provided SSL certificate.
Disable Proxies	Enable this parameter if the feed should not honor proxies set in the ThreatQ UI.



5. Review any additional settings, make any changes if needed, and click on **Save**.
6. Click on the toggle switch, located above the *Additional Information* section, to enable it.

ThreatQ Mapping

Cyfirma Cyber Research Blog

The Cyfirma Cyber Research Blog feed periodically pulls threat research posts from the Cyfirma Cyber Research blog and ingests them into ThreatQ as report objects.

```
GET https://www.cyfirma.com/cyber-research/
```

The request returns HTML. The HTML is parsed for the title, date, links, etc. The blog itself is then fetched.

```
GET https://www.cyfirma.com/research/{{ uri }}
```

ThreatQuotient provides the following default mapping for this feed:

FEED DATA PATH	THREATQ ENTITY	THREATQ OBJECT TYPE OR ATTRIBUTE KEY	PUBLISHED DATE	EXAMPLES	NOTES
N/A	Report.Value	N/A	N/A	NIKKI STEALER: EX-DEFACER TURNS SELLER OF DISCORD STEALER	Parsed from the HTML
N/A	Report.Description	N/A	N/A	N/A	Parsed from the HTML
N/A	Report.Attribute	External Reference	N/A	https://www.cyfirma.com/research/nikki-stealer-ex-defacer-turns-seller-of-discord-stealer/	Parsed from the HTML
N/A	Report.Attribute	Published At	N/A	2024-03-15	Parsed from the HTML

Average Feed Run

Object counts and Feed runtime are supplied as generalities only - objects returned by a provider can differ based on credential configurations and Feed runtime may vary based on system resources and load.

METRIC	RESULT
Run Time	1 minute
Reports	5
Report Attributes	10

Known Issues / Limitations

- The feed utilizes **since** and **until** dates to make sure entries are not re-ingested if they haven't been updated.
- If you need to ingest historical blog posts, run the feed manually by setting the **since** date back.
- This feed will only pull a maximum of the latest 2 pages of the blog.

Change Log

- **Version 1.0.0**
  - Initial release
