Support

This integration is designated as **ThreatQ Supported**.

Support Email: support@threatq.com

Support Web: <https://support.threatq.com>

Support Phone: 703.574.9893

Integrations/apps/add-ons designated as **ThreatQ Supported** are fully supported by ThreatQuotient's Customer Support team.

ThreatQuotient strives to ensure all ThreatQ Supported integrations will work with the current version of ThreatQuotient software at the time of initial publishing. This applies for both Hosted instance and Non-Hosted instance customers.

ThreatQuotient does not provide support or maintenance for integrations, apps, or add-ons published by any party other than ThreatQuotient, including third-party developers.

Integration Details

ThreatQuotient provides the following details for this integration:

Current Integration Version	1.0.1
Compatible with ThreatQ Versions	>= 4.34.0
Support Tier	ThreatQ Supported
ThreatQ Marketplace	https:// marketplace.threatq.com/ details/mandiant- intelligence-reports-cdf

Introduction

The Mandiant Intelligence Reports integration allows a user to ingest threat intelligence reports from Mandiant's API.

The integration provides the following feeds:

- **Mandiant Intelligence Reports** - returns a list of finished intelligence reports created by Mandiant.
- **Mandiant Report Download** (Supplemental) - returns details of a Mandiant report.

The integration ingests the following system object types:

- Adversaries
 - Adversary Attributes
- Indicators
 - Indicator Attributes
- Malware
 - Malware Attributes
- Reports
 - Report Attributes

This integration, Mandiant Intelligence Reports CDF, replaces the FireEye Intelligence Reports CDF.

Installation

Perform the following steps to install the integration:

The same steps can be used to upgrade the integration to a new version.

1. Log into <https://marketplace.threatq.com/>.
2. Locate and download the integration file.
3. Navigate to the integrations management page on your ThreatQ instance.
4. Click on the **Add New Integration** button.
5. Upload the integration file using one of the following methods:
 - Drag and drop the file into the dialog box
 - Select **Click to Browse** to locate the integration file on your local machine

ThreatQ will inform you if the feed already exists on the platform and will require user confirmation before proceeding. ThreatQ will also inform you if the new version of the feed contains changes to the user configuration. The new user configurations will overwrite the existing ones for the feed and will require user confirmation before proceeding.

6. If prompted, select the individual feeds to install and click **Install**. The feed will be added to the integrations page.

You will still need to [configure and then enable](#) the feed.

Configuration

ThreatQuotient does not issue API keys for third-party vendors. Contact the specific vendor to obtain API keys and other integration-related credentials.

To configure the integration:

1. Navigate to your integrations management page in ThreatQ.
2. Select the **Commercial** option from the *Category* dropdown (optional).

If you are installing the integration for the first time, it will be located under the **Disabled** tab.

3. Click on the integration entry to open its details page.
4. Enter the following parameters under the **Configuration** tab:

PARAMETER	DESCRIPTION
API ID	Your Mandiant API ID used for authentication.
API Key	Your Mandiant API key used for authentication.

Disabled ☐ Enabled

Uninstall

Additional Information

Integration Type: Feed

Version: 1.0.0

Configuration

Activity Log

API ID

API Key

Set indicator status to...
Active

Run Frequency
Every 24 Hours

☒ Send a notification when this feed encounters issues.

☐ Debug Option: Save the raw data response files.
We recommend leaving this disabled unless actively troubleshooting an issue because it utilizes a lot of disk space.

Save

5. Review any additional settings, make any changes if needed, and click on **Save**.
6. Click on the toggle switch, located above the *Additional Information* section, to enable it.

ThreatQ Mapping

Mandiant Intelligence Reports

Retrieves a list of reports from Mandiant. Additionally, the `objects[].report_id` is used as a parameter in the Mandiant Report Download supplemental feed call.

GET `https://api.intelligence.mandiant.com/v4/reports`

Sample Response:

```
{

Average Feed Run

Object counts and Feed runtime are supplied as generalities only - objects returned by a provider can differ based on credential configurations and Feed runtime may vary based on system resources and load.

Mandiant Intelligence Reports

METRIC	RESULT
Run Time	5 minutes
Reports	480
Report Attributes	6,950
Adversaries	53
Adversary Attributes	1,860
Indicators	1,355
Indicator Attributes	6,348
Malware	149
Malware Attributes	5,945

Known Issues / Limitations

- MITRE ATT&CK attack patterns must have already been ingested by a previous run of the MITRE ATT&CK feeds in order for MITRE ATT&CK attack patterns extracted from a report's Executive Summary to be related to the report. MITRE ATT&CK attack patterns are ingested from the following feeds:
 - MITRE Enterprise ATT&CK
 - MITRE Mobile ATT&CK
 - MITRE PRE-ATT&CK

Change Log

- **Version 1.0.1**
 - Fixed an issue with the `category` field that prevented users from installing the integration on ThreatQ version 4 instances.
- **Version 1.0.0**
 - Initial release
