Support

This integration is designated as **ThreatQ Supported**.

Support Email: support@threatq.com
Support Web: https://support.threatq.com
Support Phone: 703.574.9893

Integrations/apps/add-ons designated as **ThreatQ Supported** are fully supported by ThreatQuotient's Customer Support team.

ThreatQuotient strives to ensure all ThreatQ Supported integrations will work with the current version of ThreatQuotient software at the time of initial publishing. This applies for both Hosted instance and Non-Hosted instance customers.

> ⚠ ThreatQuotient does not provide support or maintenance for integrations, apps, or add-ons published by any party other than ThreatQuotient, including third-party developers.

Integration Details

ThreatQuotient provides the following details for this integration:

Current Integration Version	1.0.0
Compatible with ThreatQ Versions	>= 5.6.0
Support Tier	ThreatQ Supported

Introduction

The RSS Feed Reader CDF enables analysts to automatically ingest RSS feeds from multiple sources, directly into ThreatQ.

The integration provides the following feed:

- **RSS Feed Reader** - ingests reports as a main object and indicators as related objects.

The integration ingests the following system objects:

- Reports
- Indicators

Installation

Perform the following steps to install the integration:

> The same steps can be used to upgrade the integration to a new version.

1. Log into https://marketplace.threatq.com/.
2. Locate and download the integration file.
3. Navigate to the integrations management page on your ThreatQ instance.
4. Click on the **Add New Integration** button.
5. Upload the integration file using one of the following methods:
   - Drag and drop the file into the dialog box
   - Select **Click to Browse** to locate the integration file on your local machine

   > ThreatQ will inform you if the feed already exists on the platform and will require user confirmation before proceeding. ThreatQ will also inform you if the new version of the feed contains changes to the user configuration. The new user configurations will overwrite the existing ones for the feed and will require user confirmation before proceeding.
6. If prompted, select the individual feeds to install and click **Install**. The feed will be added to the integrations page.

You will still need to configure and then enable the feed.

Configuration

> ThreatQuotient does not issue API keys for third-party vendors. Contact the specific vendor to obtain API keys and other integration-related credentials.

To configure the integration:

1. Navigate to your integrations management page in ThreatQ.
2. Select the **OSINT** option from the *Category* dropdown (optional).

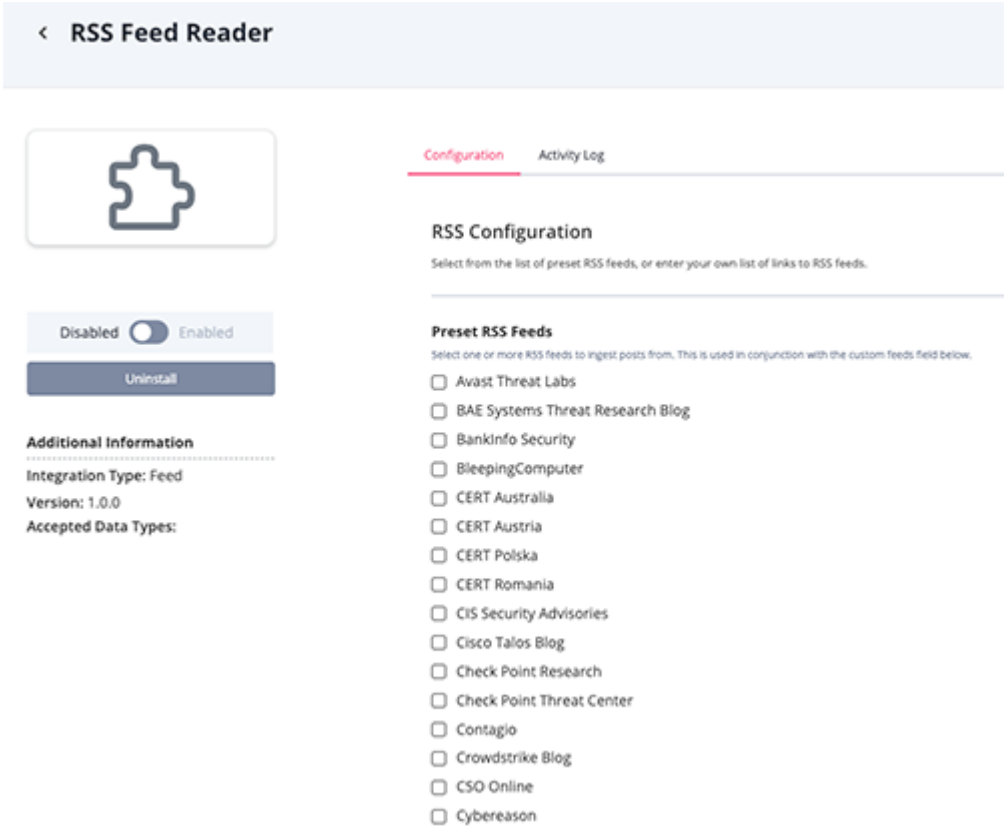
   > If you are installing the integration for the first time, it will be located under the **Disabled** tab.

3. Click on the integration entry to open its details page.
4. Enter the following parameters under the **Configuration** tab:

PARAMETER	DESCRIPTION
Preset RSS Feeds	Select one or more RSS feeds to ingest posts from. This parameter can be used in conjunction with the **Custom RSS Feeds** parameter below. Options include: ◦ Avast Threat Labs ◦ BAE Systems Threat Research Blog ◦ BankInfo Security ◦ BleepingComputer ◦ CERT Australia ◦ CERT Austria ◦ CERT Polska ◦ CERT Romania ◦ CIS Security Advisories ◦ Cisco Talos Blog ◦ Check Point Research ◦ Juniper Threat Research ◦ Krebs on Security ◦ Kryptos Logic Blog ◦ Latest Hacking News ◦ Malwarebytes Malware Analysis: The Final Frontier ◦ Malware Traffic Analysis ◦ Microsoft Security ◦ NCC Group Research ◦ Netskope Threat Research

PARAMETER	DESCRIPTION
	◦ Check Point Threat Center ◦ Contagio ◦ Crowdstrike Blog ◦ CSO Online ◦ Cybereason ◦ Dark Reading ◦ ESET WeLiveSecurity ◦ Flashpoint ◦ Fortinet Threat Research ◦ Fox-IT Blog ◦ GovCERT Switzerland ◦ Infosecurity Magazine ◦ InfoSec Malware Analysis ◦ News ENISA ◦ Palo Alto Blog Palo ◦ Alto Unit 42 ◦ Qualys Security Blog ◦ Quick Heal ◦ SANS Internet Storm Center ◦ Secureworks Threat Analysis ◦ Securlist ◦ Security Affairs ◦ X-Force Feed ◦ Sophos: Naked Security ◦ Threatpost ◦ TrendMicro ◦ Veloxity Blog ◦ Yoroi Blog
Custom RSS Feeds	Enter a line-separated list of RSS feeds (URLs) to ingest posts from. This parameter can be used in conjunction with the **Preset RSS Feeds** parameter above.
Ingest Categories As	Select one or more entities to ingest the Category field as. Options include: ◦ Attributes ◦ Tags (default)
Parsed IOC Types	Select the IOC types to automatically parse from the content. Options include: ◦ CVE (default) ◦ MD5

PARAMETER	DESCRIPTION
	◦ IP Address ◦ IPv6 Address ◦ CIDR Block ◦ FQDN ◦ URL ◦ SHA-1 ◦ SHA-256 ◦ SHA-512 ◦ Email Address ◦ Registry Key
Parsing Options	Select the parsing options to use when parsing IOCs from the content. Options include: ◦ Normalize IOCs ◦ Derive FQDNs from URLs



5. Review any additional settings, make any changes if needed, and click on **Save**.
6. Click on the toggle switch, located above the *Additional Information* section, to enable it.

ThreatQ Mapping

RSS Feed Reader

The RSS Feed Reader feed periodically pulls entries from one or more RSS feeds. Entries will be parsed and uploaded to ThreatQ as Reports.

Sample Response:

                                A ransomware attack has again put the personal information of innocent parties at
risk after it was revealed that a data breach has potentially exposed the medical records of more than three million
people.

                                Read more in my article on the Hot for Security blog.

ThreatQuotient provides the following default mapping for this feed:

> RSS Feeds typically follow a standard format, but the content will be different from feed to feed. Each mapping below is based on the available fields for each item in the feed.

FEED DATA PATH	THREATQ ENTITY	THREATQ OBJECT TYPE OR ATTRIBUTE KEY	PUBLISHED DATE	EXAMPLES	NOTES
`.title`	Report.Value	N/A	`.pubDate`	`Ransomware attackers steal over 3 million patients&#8217; medical records`	N/A
`.link`	Report.Attribute	Web Link	N/A	N/A	N/A
`.category`	Report.Attribute, Report.Tag	Category	N/A	N/A	Field may be a list or single value
`.contentType`	Report.Attribute	Type	N/A	N/A	Non-standard field
`.severity`	Report.Attribute	Severity	N/A	`Critical`	Non-standard field
`.dc:type`	Report.Attribute	Type	N/A	`News`	Non-standard field
`.pubDate`	Report.Attribute	Published At	N/A	`Tue, 14 Feb 2023 10:59:57 +0000`	N/A
`.author`	Report.Attribute	Author	N/A	N/A	N/A
`.dc:creator`	Report.Attribute, Report.Source	Author	N/A	`Graham Cluley`	N/A
`.country`	Report.Attribute	Country Code, Country	N/A	`US`	Non-standard field
`.feed_url`	Report.Attribute	RSS Feed	N/A	`https://decoded.avast.io/feed/`	N/A
`.description`, `.content:encoded`	Report.Description	N/A	N/A	N/A	N/A
`.description`, `.content:encoded`, `.title`	Related Indicator.Value	CVE	N/A	N/A	Parsed from content, when enabled

Average Feed Run

Object counts and Feed runtime are supplied as generalities only - objects returned by a provider can differ based on credential configurations and Feed runtime may vary based on system resources and load.

METRIC	RESULT
Run Time	5 minutes
Reports	521
Report Attributes	981
Indicators	437

Known Issues / Limitations

- The CDF utilizes `since` and `until` dates to ensure that entries are not re-ingested if they haven't been updated. Use the **Run Integration** button to ingest historical entries from feeds.

Change Log

- **Version 1.0.0**
  - Initial release
