Support

This integration is designated as **Developer Supported**.

Support Email: support@rstcloud.net

Support Web: N/A

Support Phone: N/A

Integrations designated as **Developer Supported** are supported and maintained by the developer who submitted the integration to the ThreatQ Marketplace. The developer's contact information can be found on the integration's download page within the Marketplace as well as in this guide.

You are responsible for engaging directly with the developer of Developer Supported integrations/apps/add-ons to ensure proper functionality and version compatibility with the applicable ThreatQuotient Software.

If functional or compatibility issues that may arise are not resolved, you may be required to uninstall the app or add-on from their ThreatQuotient environment in order for ThreatQuotient to fulfill support obligations.

For ThreatQuotient Hosted instance customers, the Service Level Commitment and Service Level Credit in the ThreatQuotient Service Level Schedule will not apply for any issues caused by Developer Supported integrations/apps/add-ons.

ThreatQuotient reserves the right to remove the Developer-Supported designation of third-party apps and add-ons if the developer is not, in ThreatQuotient's determination, fulfilling reasonable obligations for support and maintenance.

Failure by the developer to update compatibility of an app or add-on within 90 days of the release of a new version of applicable ThreatQuotient Software will result in reclassification to Not Actively Supported.

Integration Details

ThreatQuotient provides the following details for this integration:

Guide Version	1.0.0
---------------	-------

TAXII Server Version	2.1.0
----------------------	-------

Compatible with ThreatQ Versions	>= 5.29.0
-------------------------------------	-----------

Support Tier	Developer Supported
--------------	---------------------

Developer Contact	support@rstcloud.net
-------------------	--

Introduction

The RST Report Hub is an electronic library of threat reports from hundreds of security companies, individual researchers, and cyber communities.

These reports undergo transformation from human-readable formats to machine-readable ones, including STIX 2.1. Extensive multilingual translation, archiving as PDFs, and summarization are conducted. Key data, encompassing threat actors, names, software, CVEs, geolocation, industry, etc., is automatically extracted, with due credit to the original report author.

This guide will provide you with the steps to install the following RST Report HUB TAXII feed:

- RST Report HUB

This feed is a TAXII feed and does not require installation files from the ThreatQ Marketplace.

Prerequisites

You will need the following to install and utilize the RST Report HUB TAXII Feed:

- RST Cloud Account

You can contact RST Cloud Support to receive a custom RST REport Hub collection.

Setting up the TAXII Feeds

ThreatQuotient does not issue API keys for third-party vendors. Contact the specific vendor to obtain API keys and other integration-related credentials.

To set up and configure the TAXII feeds:

1. Navigate to your integrations management page in ThreatQ.
2. Click on the **Add New Integration** button and select the **Add New TAXII Feed** option.
3. Enter the following feed settings:

PARAMETER	DESCRIPTION
What would you like to name this feed	Enter RST Report HUB as the feed name.
How often would you like to pull new data from this feed	Select the frequency in which the feed is pulled. Options include: <ul style="list-style-type: none"> ◦ Every Hour ◦ Every 6 Hours ◦ Every Day ◦ Every 2 Days ◦ Every 14 Days ◦ Every 30 Days
TAXII Server Version	Select the 2.1 option from the dropdown menu.
Discovery URL	Enter the Discovery URL: https://taxii.rstcloud.net/taxii2/
Poll URL	Enter the Poll URL https://taxii.rstcloud.net/taxii2/root/collections/a194a4a6-1d59-4c75-a622-e4a1766e9120
Collection Name/Title	Enter RST Report HUB as the collection name.
Disable Proxies	Leave this option unselected.

PARAMETER	DESCRIPTION
Username	Enter your RST Cloud username.
Password	Enter your RST Cloud password.
Verify SSL	Enable this parameter for the feed to verify the provider's certificate. The certificate can be found at https://taxii.rstcloud.net/ .
Host CA Certificate Bundle	If you enabled the Verify SSL configuration field, copy the certificate you obtained from https://taxii.rstcloud.net/ into this field.

4. Click on **Add TAXII Feed**.
5. The TAXII feed will now appear as an integration tile card on your My Integrations page using the display name you supplied. You can also click on the **Category** dropdown and select **STIX/TAXII** to filter your view.
6. Click on the TAXII feed's tile card to open up its details page.
7. Click on the **Enable** toggle switch, located above the *Additional Information* section, to enable the TAXII feed.
