Support

This integration is designated as **ThreatQ Supported**.

Support Email: tq-support@securonix.com
Support Web: https://ts.securonix.com
Support Phone: 703.574.9893

Integrations/apps/add-ons designated as **ThreatQ Supported** are fully supported by ThreatQuotient's Customer Support team.

ThreatQuotient strives to ensure all ThreatQ Supported integrations will work with the current version of ThreatQuotient software at the time of initial publishing. This applies for both Hosted instance and Non-Hosted instance customers.

> ThreatQuotient does not provide support or maintenance for integrations, apps, or add-ons published by any party other than ThreatQuotient, including third-party developers.

Integration Details

ThreatQuotient provides the following details for this integration:

Current Integration Version	1.0.1
Compatible with ThreatQ Versions	>= 5.20.0
Support Tier	ThreatQ Supported

Introduction

ThreatFabric enables safe and frictionless online customer journeys by integrating industry-leading threat intel, behavioral analytics, malware threat detection, advanced device fingerprinting, and 10.000+ adaptive fraud indicators. ThreatFabric's Fraud Risk Suite provides banks with omni-channel (web and mobile) fraud visibility creating peace of mind in an age of ever-changing fraud.

The integration provides the following feeds:

- **ThreatFabric Samples** - returns information about the analysis of the different malware samples analyzed by ThreatFabric.
- **ThreatFabric Malware Families** - returns information about the different malware families tracked by ThreatFabric.
- **ThreatFabric Malware Variants** - returns information about the different malware variants tracked by ThreatFabric.

The integration ingests the following system objects:

- Indicators
- Malware

Prerequisites

The following is required to run the integration:

- A ThreatFabric API Key

Installation

Perform the following steps to install the integration:

> The same steps can be used to upgrade the integration to a new version.

1. Log into https://marketplace.threatq.com/.
2. Locate and download the integration file.
3. Navigate to the integrations management page on your ThreatQ instance.
4. Click on the **Add New Integration** button.
5. Upload the integration file using one of the following methods:
   - Drag and drop the file into the dialog box
   - Select **Click to Browse** to locate the integration file on your local machine
6. Select the feeds to install, when prompted, and click **Install**. The feed(s) will be added to the integrations page.

   > ThreatQ will inform you if the feed already exists on the platform and will require user confirmation before proceeding. ThreatQ will also inform you if the new version of the feed contains changes to the user configuration. The new user configurations will overwrite the existing ones for the feed and will require user confirmation before proceeding.

You will still need to configure and then enable the feed.

Configuration

> ThreatQuotient does not issue API keys for third-party vendors. Contact the specific vendor to obtain API keys and other integration-related credentials.

To configure the integration:

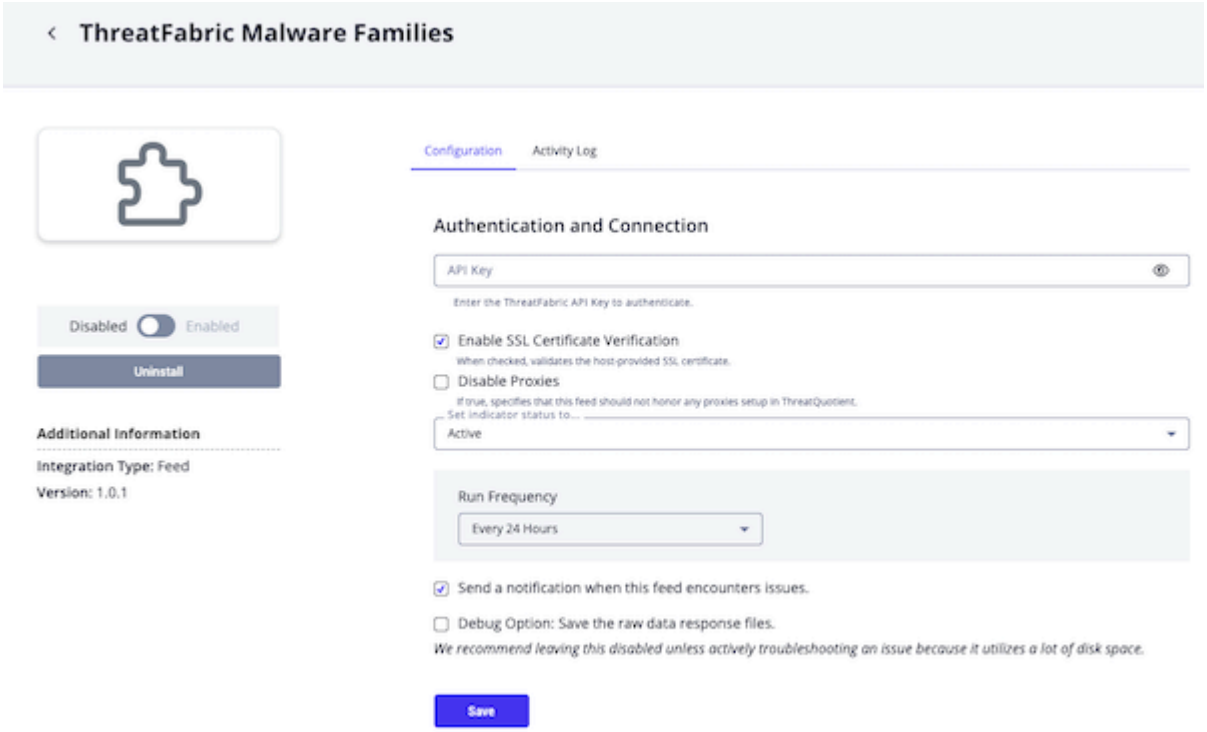
1. Navigate to your integrations management page in ThreatQ.
2. Select the **Commercial** option from the *Category* dropdown (optional).

   > If you are installing the integration for the first time, it will be located under the **Disabled** tab.

3. Click on the integration entry to open its details page.
4. Enter the following parameter under the **Configuration** tab:

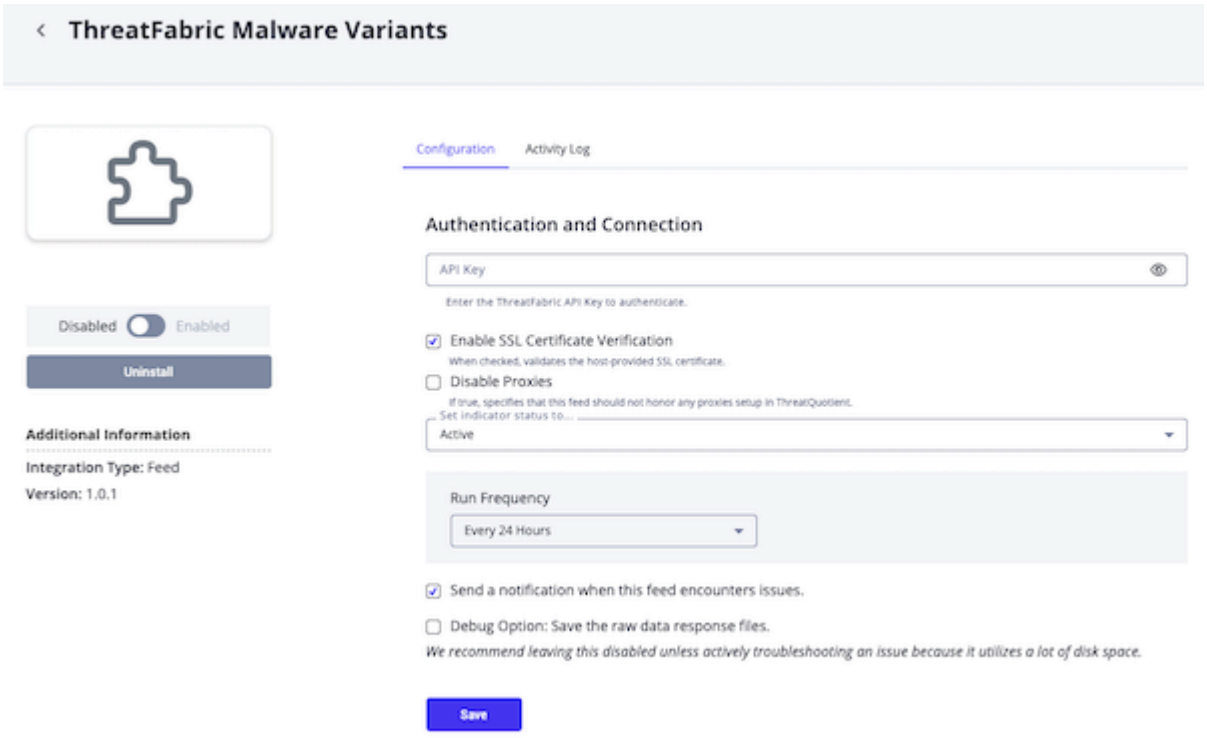
ThreatFabric Malware Families

PARAMETER	DESCRIPTION
API Key	Enter your ThreatFabric API Key.
Enable SSL Certificate Verification	Enable this parameter if the feed should validate the host-provided SSL certificate.
Disable Proxies	Enable this parameter if the feed should not honor proxies set in the ThreatQ UI.
Set indicator status to...	Select the status to apply to indicators.



ThreatFabric Malware Variants

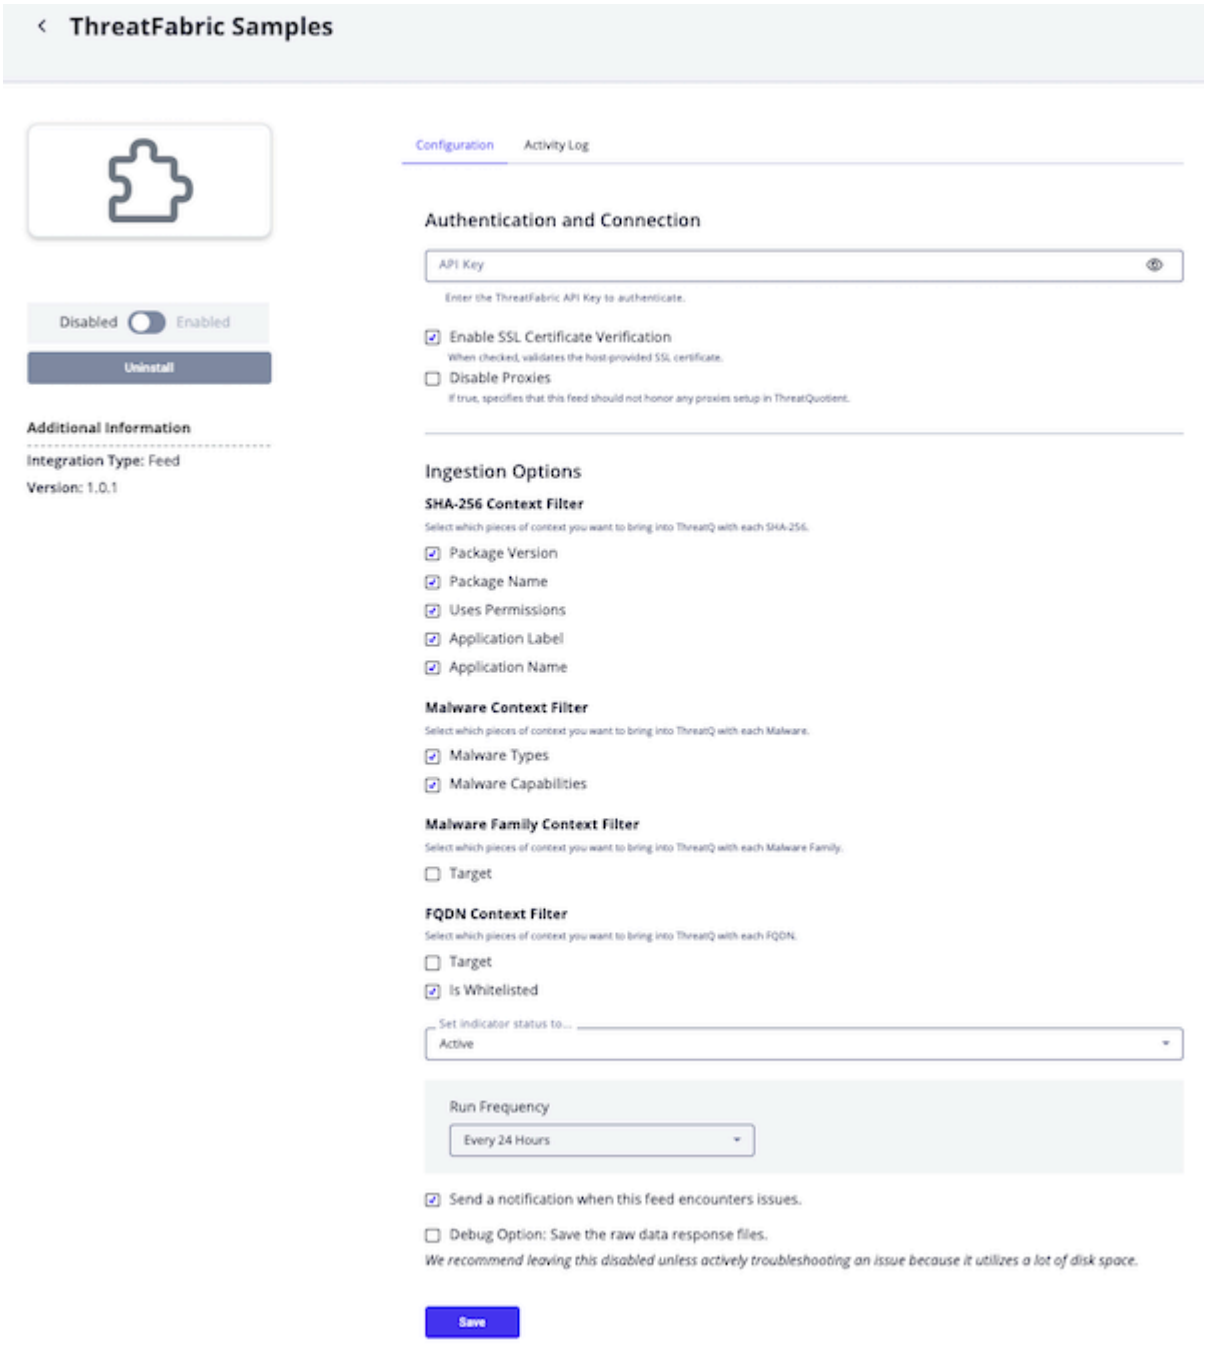
PARAMETER	DESCRIPTION
API Key	Enter your ThreatFabric API Key.
Enable SSL Certificate Verification	Enable this parameter if the feed should validate the host-provided SSL certificate.
Disable Proxies	Enable this parameter if the feed should not honor proxies set in the ThreatQ UI.
Set indicator status to...	Select the status to apply to indicators.



ThreatFabric Malware Samples

PARAMETER	DESCRIPTION
API Key	Enter your ThreatFabric API Key.
Enable SSL Certificate Verification	Enable this parameter if the feed should validate the host-provided SSL certificate.
Disable Proxies	Enable this parameter if the feed should not honor proxies set in the ThreatQ UI.
SHA-256 Context Filter	Select which pieces of context you want to bring into ThreatQ with each SHA-256. • Package Version (default) • Package Name (default) • Uses Permissions (default) • Application Label (default) • Application Name (default)

PARAMETER	DESCRIPTION
Malware Context Filter	Select which pieces of context you want to bring into ThreatQ with each Malware. • Malware Types (default) • Malware Capabilities (default)
Malware Family Context Filter	Select which pieces of context you want to bring into ThreatQ with each Malware Family. • Target
FQDN Context Filter	Select which pieces of context you want to bring into ThreatQ with each FQDN. • Target • Is Whitelisted (default)
Set indicator status to...	Select the status to apply to indicators.



5. Review any additional settings, make any changes if needed, and click on **Save**.
6. Click on the toggle switch, located above the *Additional Information* section, to enable it.

ThreatQ Mapping

ThreatFabric Samples

The ThreatFabric Samples feed returns information about the analysis of the different malware samples analyzed by ThreatFabric.

```

ThreatQuotient provides the following default mapping for this feed:

FEED DATA PATH	THREATQ ENTITY	THREATQ OBJECT TYPE OR ATTRIBUTE KEY	PUBLISHED DATE	EXAMPLES	NOTES
result[].name	Malware.Value	N/A	result[].createdAt	Maqobanko.B	N/A
result[].description	Malware.Description	N/A	result[].createdAt	Fake Financial and productivity apps with capability to perform both Spyware and Banker activity targeting Uzbekistan users.	N/A
result[].name	Malware.Attribute	Malware Family	result[].createdAt	Maqobanko	N/A
result[].name	Related.Malware.Value	N/A	result[].createdAt	Maqobanko	N/A

Average Feed Run

> Object counts and Feed runtime are supplied as generalities only - objects returned by a provider can differ based on credential configurations and Feed runtime may vary based on system resources and load.

Change Log

- **Version 1.0.1**
  - Adds the possibility to disable/enable proxies for all feeds
  - Allows users to select which attributes to ingest for each ThreatQ object type for `ThreatFabric Samples`.
  - Ingests attribute Target for FQDNs and Malware Families
- **Version 1.0.0**
  - Initial release
